### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information referred to in the information disclosure statement filed April 14, 2004 has been considered.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Valentor et al (5536068) in view of Morris (6354231). Valentor et al shows all claimed features of the instant invention with the means for providing visual and tactile feedback to a user when the lower leg portion is at a predetermined position in the upper leg portion. In Valentor et al, note the upper leg portion (12), insert (40), insert portions (41, 41), lower leg portion (30), and valley (at 71). Morris teaches configuring a furniture leg with a means (43) for providing visual (indicia) and tactile (embossment of the indicia) feedback to a user when the lower leg portion is at a predetermined position

in the upper leg portion. It would have been obvious to one having ordinary skill in the pertinent art at the time of the instant invention to modify Valentor et al in view of the teachings of Morris by adding the means for providing visual and tactile feedback to the leg structure. This modification enhances precision in adjustment of the leg structure by the user.

### ***Allowable Subject Matter***

Claims 1-12 and 17-26 are allowed.

Claims 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Adjustment indicia for a chair is shown by Gaudreau, Jr. An adjustable leg structure for a chair is shown by each of Lisbin (3150853), Conant (1922418), Heitlinger (5678892), Lin (2003/0102700), and Meara (6056353).
